- **Solar is an earner with new feed-in tariff.** When you get an approved renewable energy system installed you can now benefit from a Feed-in Tariff (FIT). Your electricity supplier will pay one tariff for the electricity you generate and one for any electricity you export to the grid. For a standard household Solar PV system they'll pay 41.3p per kWh generated and at least 3p per kWh exported. FITs replace government grants for electricity generating technologies like Solar PV and wind turbines. Grants for renewable heating systems remain but are due to be superseded in April 2011 by the Renewable Heat Incentive. To qualify for a grant your home must be insulated (270mm in the loft and cavity wall filled) with energy saving light bulbs throughout. For the latest information on renewable energy systems and incentives, **contact the Energy Saving Trust on 0800 512 012.**
